RAUTOMEAD ON ITS METTLE IN IRAQ

UK-based continuous casting technology specialist Rautomead Limited of Dundee has announced the appointment of a new agent in the Middle East.

Mr Majeed A. Al-Rawi of the El-Tech Energies and Technologies Company will be representing Rautomead's interests Iraq and Jordan, servicing Rautomead's existing customers in the region and identifying new potential customers in the wire and cable and metal processing industries.

REDUCING O2 IN THE CONTINUOUS CASTING ARENA

Rautomead's unique graphite crucible reducing technology naturally reduces the oxygen in the process enabling compact and easily integrated melting and casting solutions for the production of the very highest quality oxygen-free copper wire and cable, copper alloys and precious metals.

A WIDE RANGE

Mr. Al-Rawi will be promoting Rautomead's entire product range which encompasses fully automated machines for the production of quantities of up to 30,000 tonnes per year. For smaller scale wire rod production, a new range is capable of producing between 1000 and 3600 tonnes. While specialist precious metals' models facilitate the production of the highest quality gold and silver alloy shapes and sections.

CASTING FAR AFIELD

Rautomead Sales and Marketing Manager Guy Henderson remarked: 'The appointment of Mr. Al-Rawi is another example of the company's commitment to emerging markets following on from the launch of our Russian and Chinese language websites.'
